Product List

Dispersant

Model	Function	Application	Packing details
Tech-501	Dispersant	Tech-501 is very suitable to disperse inorganic pigment, decrease the viscosity of the system, increase the gloss and the hiding power, helpful for the substrate wetting.	25 KG/bucket
Tech-504	Dispersant	Tech-504 is suitable for all solvent-born system and helpful for wetting of pigment, strong anti-floating and anti-flooding ability.	25 KG/bucket
Tech-504S	Dispersant	Tech-504S is suitable for all solvent-born system and helpful for wetting of pigment, strong anti-floating and anti-flooding ability.	25 KG/bucket
Tech-5401	Dispersant	Tech-5401 is suitable for medium polarity system, good compatibility with many kinds of resin, suitable for all kinds of pigment, strong dispersing power and excellent store stability.	25 KG/bucket
Tech-5431	Dispersant	Tech-5431 is suitable for medium polarity system, good compatibility with many kinds of resin, suitable for all kinds of pigment, strong dispersing power and excellent store stability.	25 KG/bucket
Tech-5434	Dispersant	Tech-5434 is suitable for medium polarity system, good compatibility with many kinds of resin, suitable for all kinds of pigment, strong dispersing power and excellent store stability.	25 KG/bucket
Tech-6185	Dispersant	Tech-6185 is suitable for water-born system, low foaming, decrease the viscosity, increase the gloss, only suitable for organic pigment.	25 KG/bucket
