Product List

Lubricant			
Model	Function	Application	Packing details
954	Internal Lubricant	For rigid PVC processing - especially for the production of follow articles <ul style="list-style-type: none">• internal lubricant• improves the flow properties• increases the surface gloss• suitable for use with those products requiring optimum transparency	Plastic bag, 25 KG/PC, 20 PCS/pallet
P984	External Lubricant	For PVC <ul style="list-style-type: none">• Rigid PVC processing• Special product for the manufacture of calendered rigid PVC films For other plastic <ul style="list-style-type: none">• With its good thermostability and low volatility this ester type is an excellent processing agent for the thermoplastic, which are processed at high temperatures	Plastic bag, 25 KG/PC, 20 PCS/pallet
G60	Internal Lubricant	For rigid PVC processing <ul style="list-style-type: none">• has good compatibility with other lubricants• promote the plasticizing uniformly• improve the impact strength and welding strength• improves the flowability	Plastic bag, 25 KG/PC, 20 PCS/pallet
G78	External Lubricant	<ul style="list-style-type: none">• Rigid PVC processing• Manufacture of packing materials, preferably for Ca-Zn stabilized bottles and films• External lubricant• Improves release properties• Improves long-term stability in CaZn-stabilized systems• Improvement of long run performances on production machines	Plastic bag, 25 KG/PC, 20 PCS/pallet
